PRESS RELEASE

Leonardo, through Vitrociset, has concluded a EUR 11 million contract to supply the 'Green Data Center' of the Italian Government Printing Office and Mint

- The Green Data Center, the only one of its kind in Italy, will occupy an area of around 2000 m², contributing to the security of this critical national infrastructure
- The system will ensure operational continuity, including Disaster Recovery of the IT services provided by the Government Printing Office and Mint
- The latest generation of 'green' solutions was also introduced, such as air-to-air cooling systems for the Data Hall and Rotary UPS systems for energy continuity

Rome, 09 July 2019 - Leonardo, through its subsidiary Vitrociset, has been awarded the tender called by the Italian Government Printing Office and Mint for the supply and commissioning of a Green Data Center (GDC) solution for around EUR 11 million. The contract confirms the Group's ability to develop innovative solutions for the security of critical infrastructures.

The new system will host the equipment necessary to ensure operational continuity including Disaster Recovery of the IT services provided by the Government Printing Office and Mint. The Green Data Center will be the first of its kind in Italy, occupying an area of around 2000 m² at the Government Printing Office and Mint's site in Foggia. Its features will be such as to obtain the Uptime Institute's international TIER IV certification.

Vitrociset's Green Data Center solution has been designed to ensure that the infrastructure is solid, modular and scalable, able to manage and support the future IT needs of the Government Printing Office and Mint linked to the increase in managed data, the increasing presence of high-density x86 blade servers and storage devices that result in higher energy consumption.

Vitrociset will use the latest generation of 'green' systems, such as air-to-air cooling systems for the Data Hall and Rotary UPS systems to improve energy efficiency. The infrastructure will be housed in a prefabricated structure, arranged in an L shape on two floors, with a control room, crisis room, technical offices, break area, warehouse, and stage area.

Vitrociset, a Leonardo company, provides support, training and logistic activities in the Defence, Space and Transport markets, through the integration of state of the art technologies in ICT, in the design of systems and in simulation. Vitrociset has a key role in smart logistics in these sectors with its in-depth knowledge and powerful expertise in key technologies and systems.

Leonardo, a global high-technology company, is among the top ten world players in Aerospace, Defence and Security and Italy's main industrial company. Organized into five business divisions, Leonardo has a significant industrial presence in Italy, the United Kingdom, Poland and the USA, where it also operates through subsidiaries such as Leonardo DRS (defense electronics), and joint ventures and partnerships: ATR, MBDA, Telespazio, Thales Alenia Space and Avio. Leonardo competes in the most important international markets by leveraging its areas of technological and product leadership (Helicopters, Aircraft, Aerostructures, Electronics, Cyber Security and Space). Listed on the Milan Stock Exchange (LDO), in 2018 Leonardo recorded consolidated revenues of €12.2 billion and invested €1.4 billion in Research and Development. The Group has been part of the Dow Jones Sustainability Index since 2010.
